

Arizona

Fort Huachuca

Facility and Location

Fort Huachuca is located in Cochise County in southeastern Arizona, approximately 15 miles north of the Mexican border. Fort Huachuca is home to the Army Information Systems Engineering Command (USAISEC) whose primary mission is engineering and integration of information systems for the Army. This mission includes the design, engineering, integration, development, sustainment, installation, testing, and acceptance of information systems. USAISEC provides matrix support to the program executive officer and program manager structure for systems engineering and integration of assigned information systems.

Media Sampled and Findings

Drinking Water — Prior to 2007, 12 samples reported no detection.

Soil — Prior to 2007, 242 samples reported a high detection of 27,000 ppb.

Appropriate Actions

The open burn/open detonation (OB/OD) sites have been closed by the state. The installation is working with the state of Arizona in regards to the perchlorate detected in the soil; however, no exposure pathway has been found. Soil concentrations are below the 55,000 ppb residential and 720,000 ppb industrial soil screening levels recommended by EPA Region IX. Sampling will occur if necessary under a Remedial Investigation and under conditions where surface water is present.
